

"The late Kim Dae Jung—the remarkable political dissident who rose to be President of South Korea and to win the Nobel Prize for Peace—is revered internationally, but his reputation in his native South Korea is much more controversial and contested. In this critical biography, Donald Kirk—a journalistic eminence who has been covering Korea for more than 30 years—helps us understand why this could be so. In his fascinating book, Kirk not only traces Kim Dae Jung's great political rise, but also details the moral and financial corruption that came to engulf, and permanently tarnish, the 'DJ' Presidency. *Korea Betrayed* will be a welcome addition to the bookshelf of every student of modern Korea. Kirk's account of the failure of DJ's 'Sunshine Policy' toward North Korea, furthermore, should be 'must reading' for all American policymakers before they prepare to deal with Pyongyang."

—NICHOLAS EBERSTADT, Henry Wendt Chair in Political Economy,
The American Enterprise Institute

"Donald Kirk's *Korea Betrayed* is a comprehensive yet cogently written look at one of the most important figures in the past hundred years of Korean history. Brilliantly researched and equally well written, Kirk's newest book could not come at a more important time. Kirk's book reminds American and South Korean policy makers why decisions made in the past are so relevant for foreign affairs today—as Washington, Pyongyang, and Seoul are at a crossroads in foreign relations that will affect the security of Northeast Asia for many years to come."

—BRUCE E. BECHTOL JR., Professor of International Relations,
Marine Corps Command and Staff College and author of
Red Rogue: The Persistent Challenge of North Korea

This book recounts the rise of Kim Dae Jung from an oppressed region of Korea, his ascent to the national stage, and his encounters with the dictatorial leaders who tried to take his life and then had him tried for his role in the Kwangju revolt. The book outlines his exile in the United States and his drive for power climaxed by his election as president in 1997 at the height of economic crisis. The book focuses on his Sunshine policy of reconciliation with North Korea, his summit with North Korea's Kim Jong Il, and his drive for the Nobel Peace Prize. The story reveals the corruption that ensnared his sons and aides, the payoffs that brought about the summit—and helped to fund North Korea as a nuclear power.

DONALD KIRK, journalist and author, has covered Korea for American newspapers and magazines beginning with assignments there as Far East correspondent for the *Chicago Tribune* in the early 1970s.
